

AGRIFUEL

LIQUID BIOSTIMULANT

Premium organic biostimulant derived from sustainably sourced agricultural crop residues. It delivers a natural, biologically active solution designed to enhance soil health, plant metabolism, and nutrient-use efficiency across conventional, organic, and hydroponic systems.

- Rich in humic and fulvic acids, organic acids, amino acids, and essential nutrients
- Supports plant growth by stimulating root development, improving nutrient uptake, and activating beneficial soil and root-zone biology.

Guaranteed Analysis following ISO-19822 Protocol:

1.5% HUMIC ACID	N = 0.144 %
2.4% FULVIC ACID	P = 0.166 %
1.7% ORGANIC ACID	K = 1.573 %

INSTRUCTIONS TO USE:

This product can be applied directly to soils or injected through irrigation systems and is fully compatible with standard agrochemicals. Do not re-enter treated areas within 4 hours after foliar application and do not apply within 21 days before harvest. Wear appropriate protective equipment when handling the product.

APPLICATION RATES

For crops: Apply at a rate of 0.5–1 L per acre via drip irrigation, foliar spray, or fertigation

For hydroponics: use 7 mL of Agrifuel per 1 liter of water. Apply every week, adjusting based on plant response and growth stage.

Add the diluted solution directly into the reservoir of the hydroponic system, ensuring even circulation of nutrients

Regularly check EC, maintaining between 1 to 2.2 $\mu\text{S}/\text{cm}$, and pH levels between 5.5 and 6.5 for optimal nutrient absorption. Avoid overfeeding.

STORAGE AND HANDLING

Keep the container tightly sealed and store in a cool, dry place at 41–86 °. Refer to the MSDS for additional safety and handling information. Avoid freezing

Carbon OxyTech

APPEARANCE: Light brown liquid, pH-8
KEEP OUT OF REACH OF CHILDREN,
AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.
Flush skin, eyes or clothing as soon as possible
